MultiView Live

360° Live

Settings

Filter/Beautify

❷ When connected successfully, click **Shutter** on the shooting interface to take photos.
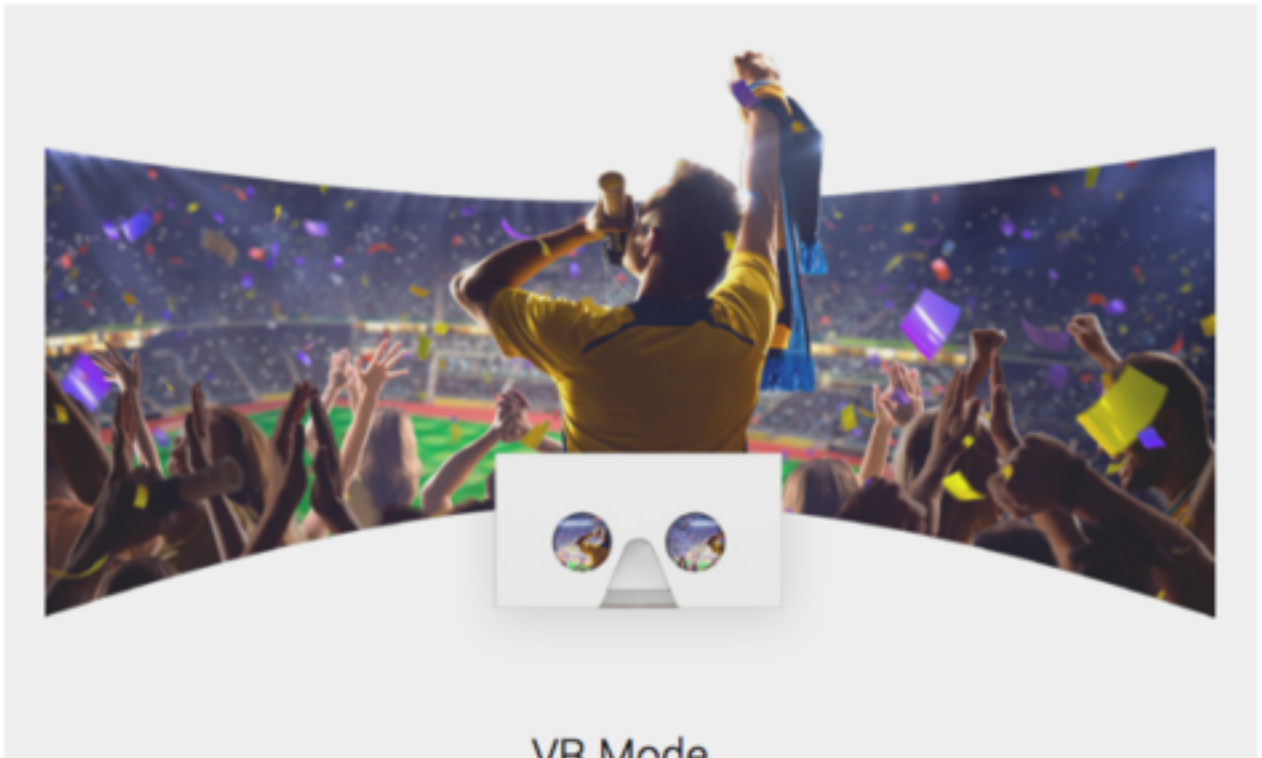

360° Video Chat

Album

❸ Click **Album** to review your photos and videos. Or click **360° Video Chat** to start a video chat.

Share

④ Click *Share* to share the image to social media platforms.

❺ Enable the VR mode in the app and place your iPhone into the camera's package. The package can be used as a VR viewer.

VR Mode

*Note:

1. Supports Micro SD cards of both UHS-I and exFAT (FAT64) formats. The maximum storage capacity supported is 128GB.
2. When carrying a Micro SD card, the Nano S can be used as a standalone camera to capture 360° photos and videos.
3. For longer recordings, the video will automatically be saved as several separate files.
4. Please avoid using the Nano S in high-temperature environments.

Hands-Free Use

Adjust angle

The included fold-up phone stand is great for 360° video chat, MultiView live and 360° live-streaming.
